Software Developer subnet labs llp

10/2022 - 07/2025

Ahmedabad, india

focused on end-to-end project delivery. I architect scalable platforms and develop features across the entire stack—from UI and backend services (payment, auth) to low-level protocol work (MQTT, GNSS). ensuring our technology stack effectively serves business goals.

Blockchain intern Skillmax acd

Bangalore/india

My internship provided me with a robust foundation in fundamental computer science areas, including operating systems, networking (specifically TCP/IP), and computer architecture. I also gained valuable exposure to a variety of technology stacks, giving me a broad understanding of the modern software development landscape.

EDUCATION

Bachelor of Enginnering Government Enginnering Collage, patan

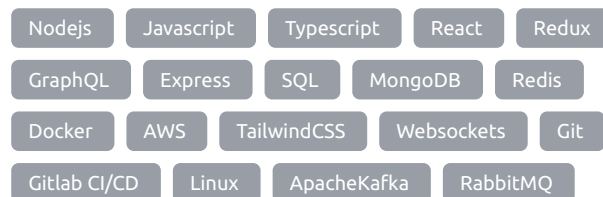

06/2018 - 05/2022
